

PROVIDING HIGH EFFICIENCY AND WORRY-FREE PERFORMANCE

M1200 Plus 14 and 15 SEER Comfort Systems

Maytag® M1200 Plus High Efficiency 14 and 15 SEER Air Conditioners & Heat Pumps

Maytag 14 and 15 SEER air conditioners and heat pumps provide you with reliable, year-round comfort.

This Maytag System includes two main components. The outdoor section is either the air conditioner or the heat pump. The indoor section is an air handler or a furnace and indoor coil. A warmer climate location will typically require a heat pump and an air handler; cooler climates need an air conditioner and a furnace.

Depending on your climate, a heat pump may handle your heating and cooling needs more economically than a separate furnace and air conditioner.

All Maytag heat pumps and air conditioners are built using proven, reliable parts. Each part is examined carefully with our rigorous quality check process. This process ensures approximately 140 inspections before any system ever leaves our manufacturing facility.

Maytag® M1200 Plus Multi-Poise Air Handlers & Indoor Coils

Indoor Section

If you replace your air conditioner or heat pump, Maytag highly recommends that you also replace the existing coil with a matched Maytag coil or air handler.* By doing this, you can ensure maximum efficiency and performance of your comfort system.

Using a variable-speed air handler or furnace can improve 14 SEER system efficiency to 15 SEER, as well as indoor air quality and sound levels. By mixing air from floor to ceiling, the

variable-speed technology creates more uniform temperatures, improved air filtration and reduced humidity levels.

Maytag Comfort Solutions

For better whole-home comfort, ask your dealer about Maytag indoor air quality solutions and our zoning systems to control temperatures in specific rooms of your choice. Maytag accessories are covered by a 12-year limited parts warranty when installed and registered with your new Maytag air conditioner or heat pump. See warranty for details.

* A matched indoor coil or air handler is a requirement for coverage under Maytag's Dependability Promise.

Energy Efficiency

Maytag air conditioners and heat pumps are rated in Seasonal Energy Efficiency Ratio (SEER). A higher SEER rating makes it easier for your system to perform more efficiently, save more energy and lower your utility bills.

Annual costs based on 36,000 Btu unit, 1,500 cooling load hours and .08/kwh. Actual costs may vary depending on climate conditions, energy rates and patterns of usage.

Environmentally Smart

Maytag air conditioners and heat pumps are now available with Smart Cool 410™ refrigerant, an earth-friendly, non-ozone-depleting refrigerant.*

Reliable Performance

Maytag air conditioners and heat pumps feature the Copeland Scroll™ Compressor, one of the most reliable compressors available in North America.

Quiet Comfort

Maytag air conditioners and heat pumps include additional features for extra quiet-performance, such as swept-wing fan blades, sound reducing bases, and compressor blankets.

Innovation & Style

These models feature brushed, stainless steel cabinets and doors for superior quality and rust-free durability.

*Also available in R-22 refrigerant.

Peace of Mind

The M1200 Plus Series of products feature a 12 Year Worry-Free Limited Warranty on parts, and your Maytag dealer has added 12 years of labor for added peace of mind.*

Plus, our Dependability Promise states that your entire unit will be replaced if the compressor fails within the first 12 years of purchase, when installed with a Maytag matched indoor coil or air handler.*

Ask your Select Maytag heating and cooling dealer or visit us at www.maytaghv.com for warranty details.

*Applicable to the original owner.
